Experience & Expertise

From routine inspections and windshield and cabin window repairs, to factory approved wing modifications, West Star can provide the service you need including major inspections:

- **30-Year Inspections**
- **Falcon 900 3C & B-4C Inspections**
- **Falcon 900 EX-2C**
- **Falcon 2000-2C Inspections**
- **Falcon 2000 EX EASy-1C Inspections,**
- **Falcon 50 "4C" and CPCP Inspections**
- **Falcon 20 – 24 year MCI**
- **Falcon10/100 "2C" Inspections**

With a full, on-site engineering department, structural repairs and special airframe modifications can be accomplished by our trained technicians and on-staff FAA-DER engineers.

Dependability & Performance

West Star engine specialists are trained, experienced, and FAA approved to inspect, repair or modify the engine specific to your model Falcon including:

- **50Dash4 performance upgrade for Falcon 50**
- **Factory Authorized Honeywell TFE731 Line Service Center**
- **CFE738 Engine Support**

Advanced & Innovative

West Star is experienced and authorized to repair your existing complex avionics systems or install the newest technologically advanced avionics, including: SATCOM, Nav Systems, EGPWS, TCAS/ACAS, Flight ID, EFIS, cabin entertainment / information systems, RVSM, and RSVM certified pitot-static testing. Installations are engineered by our on-site FAA-DER engineers in close association with most major avionic OEMs.

Our major locations are class I, II and III avionics repair stations and Factory Authorized installation centers for:

- **Honeywell**
- **Collins**
- **Universal**
- **Garmin**
- **L3 Communications**
- **AirCell**
- **EMS Technologies**

Using our industry avionics OEM associations, we remain a pioneer in innovative modifications and installation STCs, including:

- **Universal EFI-890R 4-tube Installation STC in Falcon**
- **Collins ProLine 21 Install STC in Falcon**

Form & Function

Working closely with you, our experienced staff will design and update your aircraft's interior and exterior using extensive material selections and uncompromising attention to detail.

West Star can rejuvenate your Falcon's interior so that you will enjoy that coveted new aircraft look.

- **Interior Designers On Staff**
- **Cabinetry Design, Fabrication And Finish**
- **Interior Design, Modification And Upholstery**
- **Floor Plan Reconfiguration**
- **Soundproofing**
- **Custom Plating**
- **Entertainment Systems**
- **Cabin Communications**

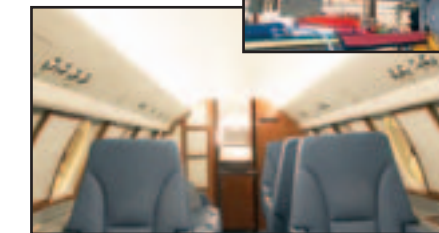

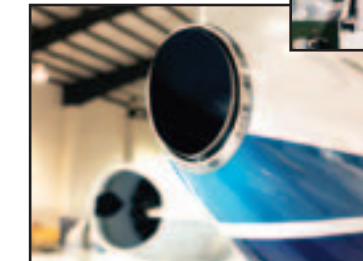

West Star Aviation, Inc. provides high-quality exterior paint for all Falcon series aircraft at our ALN or GJT state of the art facilities. Additionally, we specialize in all types of repairs during the paint process including our in-house window repair services for cabin windows and landing light lens repair. West Star has staff experts who provide custom computerized exterior renderings for your approval.

Evolve & Improve

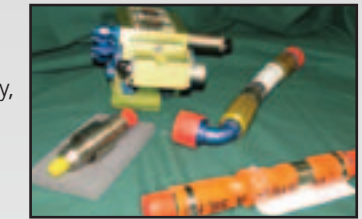

With structural and systems FAA-DER engineers on staff, custom modifications that improve the performance and function of your Falcon aircraft are no problem for West Star. Whether it is an avionics STC or the installation of new Falcon 50-4 engines, these improvements keep your Falcon up-to-date and in some cases, consistent with the newest Falcon model aircraft.

- **50-4 performance upgrade**
- **Aft baggage modification**
- **Aft compartment door step**
- **LED cabin lights**
- **Battery relocation**
- **APU upgrade**

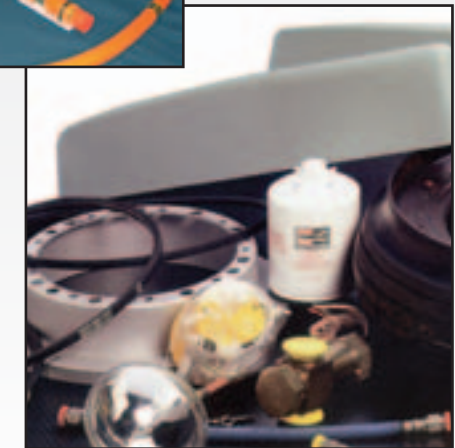

Confidence & Availability

From a new battery or landing light to hard to find system components, you can be confident that we know how important quick, reliable parts service can be. Minimizing your AOG time and getting you back into service is key. For maximum availability, West Star carries an extensive inventory of spares, and through its network can locate just about anything you might need.

- **AOG parts support**
- **Component and accessory overhaul and exchange**
- **Computerized bar-coded parts inventory**
- **Experienced, air-frame-specific purchasing staff**
- **ILS and parts base inventory locator system**
- **Core and warranty processing personnel on staff**
- **Detailed inspections and strict QA from reception through installation**
